

Dear FCC,

I have recently learned of this issue brought on by the NAB (petition 04-160) and I am saddened by this. Not only do I pay for satellite services to get music, traffic and weather channels, I have a friend who works out in the desert who can't get regular radio channels in clearly, but gets satellite radio clear as a bell. If this petition goes through, him and his fellow employees will not get important information on the way to the job and on the job. That is not safe and it certainly is not fair.

Satellite radio is our right. Don't take that away. Please reject their petition to stop satellite radio airing weather and traffic information.

Regards,
Maya Friszell
